SMALL IS THE NEW

BIG

IN ADDITIVE MANUFACTURING

No 2, 2017

A newsletter from Digital Metal[®] about the possibilities within high-precision binder-jetting

Experience the new Digital Metal[®]

A few weeks ago, we launched our new website, digitalmetal.tech. Visit it to learn more about the Digital Metal technology and how it can help you boost your productivity. Be sure to bookmark digitalmetal.tech now!

Expand your possibilities

Digital Metal offers advanced 3D printers along with all the support you need to set up your own production. Check out all their features and benefits [here](#). And take the opportunity to listen what the French [CETIM](#) (Centre Technique des Industries Mécaniques/Technical Center for the Mechanical Industry), a non-profit establishment supporting French industry to adapt new technologies, says about our machines.

Watch out for Montfort!

Montfort is a successful startup aiming to revolutionise the watch industry with technology-based solutions. 3D printing allows the company's designers to integrate their passion for the Swiss Alps in the watch design. [Hear their story](#).

Meet us at formnext

Welcome to visit us at formnext in Frankfurt, Germany, between 14 and 17 November. You will find us at stand 3.0-G10.
