SMALL IS THE NEW

BIG

IN ADDITIVE MANUFACTURING

**No 1, 2018**

A newsletter from Digital Metal<sup>®</sup> about the possibilities within high-precision binder-jetting

## Digital Metal expands facilities in Höganäs

The growing demand for AM components and 3D printers also means that Digital Metal is now ready for a major expansion of its operations, both in terms of production area and number of employees. Six new engineers and technicians will be employed to assist in the development of materials and machines. The production plant and the office in Höganäs will be expanded by 50%. [Read the full press release](#)

## DM P2500 in serial production

Thanks to the great interest in Digital Metal's unique binder-jetting technology, we are now starting serial production of our 3D printers. The first batch consists of six new printers containing the latest automation electronics. In addition, we have reduced the overall dimensions of the machine, making it more easily positioned. Our existing machinery is being upgraded to the latest technology at the same time. [Explore DM P2500 in detail](#)

## Take a 360° virtual reality tour

Do you want to take a look inside our production facilities in Höganäs? We have created an exciting virtual 360° tour that puts you in the middle of the action.

Experience every step of our state-of-the-art production. [You can't get any closer than this!](#)

## 2017 and 2018 events

Last autumn, Digital Metal participated in a number of exhibitions including TCT, EuroPM and formnext. The new Digital Metal booth has drawn a lot of visitors and the build box competition has been a great success. "This event clearly demonstrated how additive manufacturing is moving more and more towards serial production", says Alexander Sakratidis, Sales Manager at Digital Metal.
